- **Make better portfolio decisions by integrating all relevant data with your project portfolios.**
- Establish the foundation: OneConnect integrates agile work, major projects on work management systems, financial actuals and resource data, all in OnePlan

Move Beyond Single Integrations to Total Portfolio Connectivity

One Flat Fee, Up to Ten Connectors
Choose any ten from the catalogue for a single annual fee. One line item, one renewal, one number your finance team can forecast.

One Contract, One Owner
OneConnect is hosted, monitored and maintained by OnePlan. No middleware to license, no integration platform to staff, no scripts of your own to keep alive.

Your System of Record, Complete
Delivery from the execution tools, people from the directory and the HR system, money from the ledger. One portfolio built from every source that matters.

Add Tools Without Adding Cost
When a team adopts something new, swap it in. The portfolio absorbs the change instead of the change breaking the portfolio.

Twelve Connectors.
Pick Any Ten.

No more managing them one contract at a time.

10
Connectors included in the bundle

1
Flat annual fee, one renewal date

↑
Visibility across every system

> *OnePlan received the highest possible scores in the integration and roadmap criteria.*

What You Gain

- One predictable number instead of a dozen line items.
- No integration platform to license, staff or maintain.
- Every team keeps the tool they already work in.
- One portfolio, one truth, one place to decide.

Twelve Connectors. Choose the Ten That Matter. Swap Them Whenever Your Real Estate Changes.

Every connector below is included in the catalogue. Pick the ten that map to the systems your organization actually runs, and swap them as your estate changes. Each connector is configured, scheduled and monitored in the same OneConnect console.

EXECUTION & DELIVERY

Azure DevOps
Any work item type, including epics, features, bugs, and tasks, is synced both ways with your Azure DevOps hierarchy.

Jira
An epic or a whole project becomes a plan, and stories, tasks and bugs fill the work plan.

Smartsheet
Sheets become plans and rows become schedule tasks, with ten mappings ready out of the box.

Monday.com
Boards become plans, and items, groups and subitems land in the work plan with dates and status.

Asana
Projects become plans with sections, tasks, subtasks and dependencies arriving intact.

SERVICE & CUSTOMER

ServiceNow
Projects, tasks and demand move between the Now Platform and the portfolio on your schedule.

Salesforce
Opportunities and strategic accounts become plans, so delivery starts the day a deal qualifies.

IDENTITY & PEOPLE

Microsoft Entra ID
Directory users become resources, with department, manager, joiners and leavers kept current.

Workday
Workers become resources, so the planning pool always matches your HR system of record.

DATA & DOCUMENTS

Microsoft SQL Server
Plans, resources, resource plans and financials are imported from your database or a view.

Tabular Data
Any system that can export a CSV, including ERP and accounting actuals, from SharePoint or SFTP, can be imported into OnePlan.

SharePoint
Lists become plans for intake and governance, with mapped values flowing back on save.

One Platform Behind Every Connector

Your Systems	Secure Access	OneConnect	OnePlan
• Delivery tools • Service & CRM • Directory & HR • Database & files	• Scoped service principals • API tokens & OAuth • Per-integration keys	• Field mapping • Sync strategies • Schedules & filters • Job logs & alerts	• Portfolio & roadmaps • Resource Center • Financial Planner • Dashboards & analytics

One console for every connector. The same mapping interface, the same scheduling, the same job logs and alerts, whichever ten you choose.

What Changes When You Bundle

	Buying connectors one at a time	The Ultimate Connector
Commercials	A separate negotiation for each system	One flat annual fee for up to ten
Renewals	A different date and owner for each	A single renewal to manage
Adding a tool	New procurement cycle, new budget ask	Swap a connector inside the bundle
Administration	Consoles, credentials and logs per tool	One console, one credential model
Engineering	Middleware licence or in-house scripts	Hosted and maintained by OnePlan
Forecasting	A number that moves every quarter	A number finance can plan around

Connectors are otherwise licensed independently under OneConnect. The Ultimate Connector replaces that with one agreement.

Where the Time and Cost Come Back

No Integration Platform
No middleware licence, no iPaaS subscription, no integration developer on staff. OneConnect is hosted, monitored and maintained for you.

No Manual Roll-Up
Nobody spends the last week of the month chasing status in six systems and pasting it into a deck that is stale by the readout.

No Rebuild When Tools Change
Teams change tools. With a bundle you swap a connector instead of scoping, funding and building a new integration.

No Surprise in the Budget
One fee, one renewal. Adding the eighth or ninth system does not reopen a commercial conversation.

What Customers Say About Connecting Their Systems

Published, verifiable customer reviews and case-study quotations. Reproduced as written.

> *OnePlan's standout feature was its integration with our preferred tools. Our project managers have varying preferences— some prefer Project for the Web, some Teams Planner, while others swear by Project Pro. OnePlan's ability to sync existing project plans was a game-changer.*
>
> **Mike Johnson, Project Coordinator**
> McCarthy Tetrault · OnePlan customer story

> *OnePlan has become our single source of truth, helping us keep projects, resources, and priorities aligned across our global teams.*
>
> **Simone Battaglia, Senior Manager, EU PMO**
> Diasorin · OnePlan customer story

> *For us, it was that OnePlan seamlessly integrates with Azure DevOps - which was key for our Agility vision. OnePlan is also highly configurable to support various delivery models – traditional, Agile, hybrid, or Lean Portfolio Management (LPM).*
>
> **Given M., Information Technology, Apparel**
> SoftwareReviews · July 2025 · 9 / 10

> *Currently we use Teams, PowerBI, and PowerApps, so integrating into these was super easy.*
>
> **Scott M., Chief Information Officer**
> G2 · July 2024 · 4.5 / 5

> *OnePlan's ability to integrate and serve as a hub of data has provided an opportunity to streamline processes, reduce burden on proposal teams, and bring data from unconnected systems together to provide new opportunities for improvement.*
>
> **Russell Matney, Manager Operational Excellence & Design**
> Framatome · OnePlan customer story

> *Integration within Microsoft ecosystem - we leverage their integration with Teams as our main project portal, PowerBI reporting, and SharePoint Incorporation of other project management tools - we allow teams to work in whatever platform they choose (Project, Planner, JIRA...) and integrate that data to OnePlan for consolidated visibility.*
>
> **Verified User in Logistics and Supply Chain**
> G2 · May 2024 · 4.5 / 5

> *The first and most key aspect of OnePlan that I appreciate is its ability to integrate with various tools and allow for a single source of truth for the company.*
>
> **Yasmine A., External Relations Coordinator**
> G2 · November 2024 · 4.5 / 5
