OnePlan

FEDRAMP HIGH, CLASS D CERTIFIED

OnePlan Gov: Align investments to mission outcomes

Mission delivery starts with visibility you can trust

Federal agencies are under constant pressure to **deliver measurable outcomes, manage risk, and maximize the value** of every investment.

OnePlan helps agencies connect priorities, funding, programs, resources, and performance in a single governed platform delivered through a **FedRAMP High, Class D certified environment.**

The result:

- Greater visibility
- stronger oversight
- More confident decision-making across the portfolio

What this means for your agency

Deploy with confidence
Adopt a FedRAMP High, Class D certified offering that satisfies stringent federal security and compliance requirements.

Extend your Microsoft ecosystem
Add portfolio and program governance without replacing the Microsoft technologies teams already use.

Govern mission-critical work
Connect investments, programs, budgets, resources, risk, and performance in a single governed environment.

Improve oversight and decision-making
Give leadership a trusted view of funded work, delivery status, capacity, performance, and risk.

Why agencies choose OnePlan

- **Built for Microsoft:** Works with the Microsoft ecosystem government teams already use, including Microsoft 365, Azure Government, Teams, Power BI, and Azure DevOps.
- **Governed AI:** Sofia AI helps users answer questions, identify risks, and create reports from governed portfolio and program data, with role-based access, auditability, and human oversight.
- **Adaptable to PPM maturity:** Supports configurable portfolio hierarchies and governance models across strategic, tactical, and operational levels.
- **Security posture:** Designed to align with FedRAMP / GovCloud requirements for secure public-sector deployment.
- **Fast Time to Value:** Easy to use, delivering PPM results across projects/epics, resources, finances, and governance from day one.

OnePlan

The mission problems OnePlan Government solves

Connect your budget to mission outcomes
Tie investments and spending directly to strategic priorities, outcomes, and performance.

Leadership gets a single view across programs
Roll up cost, schedule, risk, outcomes, and status into one portfolio view leadership and oversight can trust.

One system for cost, schedule, and performance
Bring schedule, budget, actuals, and performance together to understand program health and forecast outcomes.

Know if you have the people to deliver the plan
Forecast demand against workforce capacity so leaders can identify gaps before they affect mission delivery.

Core capabilities

Strategic Portfolio Management for Government
Connect agency strategy to funded work and prioritize investments against mission outcomes.

Integrated Program Management
Unify programs, milestones, dependencies, budgets, workforce, and schedules in one governed environment.

Capital Planning & Investment Control (CPIC)
Support investment planning, budgeting, and reporting aligned to FITARA and CPIC processes.

Earned Value Management
Integrate cost and schedule performance to improve visibility, oversight, and program control.

Resource & Capacity Planning
Forecast workforce capacity and demand across the portfolio, so programs are staffed to what the mission actually requires.

Risk & Benefits Management
Identify, score, and mitigate risk while tracking the benefits each investment is expected to deliver, and whether it does.

Deployment options for every level of government

Azure Government Cloud
US data residency
OnePlan deployed on Microsoft Azure Government with U.S. data residency and government-specific security and compliance capabilities.

FedRAMP certified
Federal civilian authorization
FedRAMP High (Class D) certification for federal agency workloads, with DoD IL5 planned.
